

## Pre-Arranged Bye List

This is a list of Pre-Arranged Byes (e.g. players which have requested a bye for a round prior to the start of the tournament). It is not used to allocate byes to players, if there are an odd number of players in a tournament. They are handled on the pairing list.

The pre-arranged byes are used by the automatic pairing systems to automatically allocate the bye to the required player on the requested round and allocate the required score.

### Left Hand Side – Player List

The left-hand side of the screen is the list of players in the tournament.

### Right Hand Side – Pre-Arranged Bye List

This is a list of pre-arranged byes for the tournament.

To enter a pre-arranged bye, enter the player's PIN, the round for the bye and the score they will receive directly into the Pre-Arranged Bye list.

Score can be entered by pressing a single key. "1" for a full point bye, "H" for a half point bye, "0" for a zero point bye. The score allocated to the bye will depend on the points system being used for the tournament.

### Right-click pop-up menu

The right-click pop-up menu provides two options:

- Delete  
Allows the selected avoid in the Bye list to be deleted

- Clear All  
Allows all the pre-arranged byes to be deleted from the Bye List. The action must be confirmed before the byes are deleted.
